

IS231: Web technology project

Phase 2 requirements

1. Add a new homepage for your website with the four names of the recommended projects(E-Commerce Website, Real Estate Listing Site , Recipe Sharing Website, Blog Platform). On clicking on the name of your chosen project, the page should load your website else nothing happens.

This homepage will be common across all projects so try to design it in a good way.

2. Add all needed JavaScript and AJAX code for the built HTML pages to enable all frontend validations , button actions and navigation through your website.

Add all JavaScript code in separate file(s)

3. Add CSS in external file(s).

Important Rules:

- **Phase 2 Deadline 6/12/2024 at 11:59pm.**

- Teams should be formed from the same lab or with the same TA. - No hard coded values for mentioned attributes user should enter his values and the system should store those values.

- Add any needed VALID assumptions and validations other than the mentioned validations at the client side and server side to complete the project requirements.

- Add any needed JS/CSS/images in a separate directory in your project. -

Any cheating project will be graded ZERO.

- **ALL TEAM MEMBERS** will be discussed.

- Compress project to:

LabNumber_LeaderID_Projectnumber_TAname_phasenumber.zip/.rar -

The project folder should include the whole code files and a cover page for student names, IDs,Group number, project name and project number - Only the team leader will submit the project.

- NO late submission is accepted.
